## Cherry Blue Switches

50 million keystrokes. 108 standard keys, 13 function keys, and 1 control dial

Cherry MX blue switches are among the most proven and time-tested in the industry, ensuring maximum keyboard durability and high tactile feedback for a distinctly reliable gaming experience.

## N-KEY Rollover

Settings to suit your gaming style.

Ensures each key is scanned independently by the keyboard hardware while also being able to customize their function. Each keypress is correctly detected regardless of how many are being pressed at once – maximize your keys-per-minute with no more unregistered key inputs.

## 16.8 MILLION Customizable Color Options

RGB backlighting colors. Synchronized lighting effects among devices

Easily set your favorite color and combinations with over 16.8 million customizable color options to choose from. Flash your team colors, light up your room, or boost your immersion with mood-appropriate color combinations to take your gaming experience to the next level.

## Exclusive Software

Synchronized lighting effects with other AOC devices

Gaming devices with exclusive control software. Why only light up your keyboard when you can do synchronized effects with all your gaming devices at once? Lighting software and synchronization ability among multiple AOC gaming devices will unlock new possibilities and combinations to transform the gaming experience.
