## OUTEMU BLUE SWITCHES

Outemu blue switches are among the most known in the gaming keyboard world, known for reliability and accessibility. Play your highest actions-per-minute strategy with a keyboard that responds perfectly every time.

# 12

## RGB LIGHTING EFFECTS

16.8M RGB customizable backlighting colors

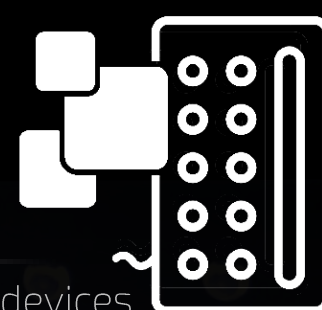

Gaming is experiential. Take your immersion to the next level by flashing your team colors or light up your gaming setup via the device's various built-in lighting effect options to your heart's desire.

## EXCLUSIVE SOFTWARE

Synchronize lighting effects with other AOC devices

Use AOC G-Tools to program macros and execute complex commands or a series of actions, configure RGB light settings and buttons, and manage your user profiles.

## N-KEY ROLLOVER

All keys programmable; 32 bit MCU, 1ms report rate

Ensures each key is scanned independently by the keyboard hardware. This means that each keypress is correctly detected regardless of how many are being pressed at once. Unleash all possibilities with no more unregistered key inputs.
